The currency was more preferable for them to hold, and the time wasted in counting the silver coin could more advantageously be used. It is said that there is only about \$100,000 worth of silver coin in New York. About this period of the year a certain portion of the quantity of silver in the home market is bought by silversmiths and jewelers for manufacturing purposes. But as the trade is dull, owing to insacial troubles, their portion of the silver remains in the market, thus aiding 10-bear down the rate. These causes combined have sufficed to create such a marked decline in the exchangable value of silver, which has always led greenbacks from its international use as a medium of exchange. services of the distinguished Rabbi, the Rev. It now boasts of a building that cost \$210,000, with a Library of over 50,000 volums, and a magnificent cabinet. The fourth grand gift concert for its forther endowment will take place December 8d, and at this concert \$1,500,000 cash is distributed to the ticket holders, the highest prize being \$250,000, and scaling down to prizes of \$50, which is the smallest sum given. As there is a prize to every fifth ticket, it is easy to see that the patronage of this concert is a patronage that pays, there being great chances of small losses. Hon. Thos. E. Bramlette, late Governor of Kentucky, is the manager, and tickets and interestion may be obtained by adreturn home by Smyrns and Athens.

THE prospect for the Republic France, as in Spain, looks brighter of late with every day's report. The triumph of the Republicans in the election of DR REMUSAT by the electors of Toulouse, and their success by very large majorities in four other provincial departments on Sunday, will be hailed as cheering indications of a coming victory over the Bourbons and Monarchists in the French Assembly THE last annual report of the British

land and emigration commissioners is almost incredible in its disclosures of the revolutionary effect of steam upon emigration to America. It tells us that of the nearly 266,000 emigrants who came from British ports to North America during the year 1872, no less than 261,846 equal to 9804 per cent, of the whole went in steamers, and only 4,106 in sail idg ships. The proportion of those who go in steamers has shown a continuous crease since 1868, when it amounted to less than 46 per cent, of the whole.

POTATORS.—The potato crop for 1873 is, in many parts of the West, well nigh a failure. The moist weather of the early spring gave the early varieties a start sufficient to insure a good crop, but later droughts have effected disastrously the later kinds. Our standard variety-the peachblows-are reported an especially poor yeild. In the spring of '72 they were worth 60 cents per bushel. Last spring they brought 40 cents. Now they readily bring \$1 00 per bushel to such of the farmers as are fortunate enough to have them to sell. Probably the price of potatoes will be very high next spring, and it becomes consumers to act upon these facts while they may be procured at all. Many tarmers are already buying for their own

SERBATIONAL reporting is canted to fine point in England, A reporter who saw Gladstone at church says: "The Premier, who looked careworn and aux-lous, entered heartily into the service, and on the singing of the second hymn, 'Jerusalem, my happy home,' appeared to emphasize the words 'When shall my labor have an end?"

THERE is one bright spot in the history of college ruffianism this year. Last year the then Freshman class at Harvard gave a pledge that on coming to that altitude of "wise fools"—that is Sophomores— it would refrain from hazing the Fresh-men, and this year the class has re-decemd its piedge and behaved like gen-tlemen towards the entering class.

A John Bull, conversing with an In-dian asked him if he knew the san never sets in the Queen's dominions, "No," said the Indian. "Do you know the reason why?" asked John. The Judge has been morbid, if not insene, for months, and one of his delusions, has been that the public man of Kansas were in a conspiracy to keep him out of public life, lest his should prove dangerous rival. In 1803-63 he was considered

ous rival. In 1863-63 he was considered a very promising member of the ultra wing of Radical Republicans. He threw away his chances in political life by an able speech in the House, substantially demanding on the highest anti-slavery grounds the abandonment of the war and the recognition of the Southern Confederacy. Since then he has always been a luckless office-holder or more luckless office-seeker.
